Dear Larry,

I recently received Neurosciences Research Program Bulletin 11(5) December 1973: "Contributions of clonal systems to neurobiology". After a small surprise that you had been overlooked (or otherwise did not appear) as a participant, it occurred to me that you should not fail to know the reference.

Marguerite and I thank you for your greetings.

Yours,

Joshua Lederberg
Professor of Genetics

P.S. I did already have a reprint of your JNb 3 paper, so I put the suplicate back in the mail to you.
